-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3747

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Frank (DE ('316)).

In particular, the applicant's attention is directed to Fig. 4.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank ('316) in view of Frank (WO (01/09506)).

Frank ('316) applies as noted above and Frank ('506) at Figure 1, teaches a connector attached to the fuel rail via a bonded connection (3). The pipe head seats outside the main pipe body.

It would have been obvious to modify Frank ('316) by attaching the pipes as taught by Frank ('506) because it was known to use a separate bonded connection for the fuel pipe heads outside the periphery of the accumulator.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frank ('316) in view of EP ('364).

Art Unit: 3747

EP ('364) teaches using a fixed restriction in a pipe connection leading from a fuel rail. The restriction is essentially part of the pipe connector and it would have been obvious to make this connector a one-piece structure since the two-piece structure was an improvement over the known prior art.

Claims 4, 6, 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular, the art shows various known ways to connect injector pipes to a common rail.

Any inquiry concerning this communication should be directed to Carl Miller at telephone number 308-2653.
